Verma, R. D. ..	The spectrum of iodine excited in the presence of argon, 197.
Verma, Shiva Mohan ..	*See* Singh and Verma.
Xeroudakes, George and Moessner, Alfred	On equal sums of like powers, 245.

TITLE INDEX

Absorption spectra of substituted thianaphthenes (Padhye and Punyarthi), 130.

Binary alloys exhibiting miscibility in solid and liquid phases, thermodynamic properties (Rastogi and Varma), 336.

Carrier free tellurium tracer, electrolytic purification of (Mazumdar), 106.

Cauchy's problem for the wave equation $\left(\frac{\partial^2}{\partial t^2} - \nabla^2 + k^2\right)\psi = 0$, solution (Malaviya), 190.

Chalkones and flavanones, nuclear methylation (Goel and others), 180.

Clinohumite Sausar Series, Bhandara District, India (Muthuswami), 9.

Copper in a hyperbolic cell, some polishing experiments on (Ramanathan and Sanghi), 284.

Diamond, the diffraction of X-rays, III (Raman), 1.

Diffraction of light by superposed parallel supersonic waves—general theory (Mertens), 288.

Epitaxial growth of thin films (Dixit), 330.

Force constants of diboranes (Venkateswarlu and Thirugnanasambandam), 344.

Force constants of nitryl chloride and nitryl fluoride (Hariharan), 49.

Hermite polynomials, generalisation, a note on (Rajagopal), 145.

Heterocyclic rings containing nitrogen, formation, studies, VI (Rao and Ratnam), 256.

Hexachloroceric acid, studies, V (Moosath and Rao), 317; VI (Moosath), 324.

Ionospheric drift at Ahmedabad, measurement, from fading patterns of reflections on 2·6 and 4·0 Mc./s. (23° 02′ N.; 72° 38′ E.) (Sethuraman), 84.

Isoquinoline series, studies, IV (Govindachari and others), 111.

Light propagation in absorbing crystals possessing optical activity—Electromagnetic theory (Pancharatnam), 227.

Like powers, equal sums (Xeroudakes and Moessner), 245.

Līlāvatī—A new analogue computer for solving linear simultaneous equations and related problems, I (Ramachandran and Krishnamurthy), 152; II (Krishnamurthy), 269.

Monazite, Travancore, studies, VI (Kurup and Moosath), 76.

Optically active and racemic compounds, chemical constitution and ultraviolet absorption spectra, relation between, studies (Singh and Verma), 29.

Percussion figures in crystals (Raman), 307.

Polarographic behaviour of organic iodocompounds, II (Ramanathan and Subrahmanya), 62.

Polarographic reduction of pyruvic acid (Doss and Menon), 43.

Prunus puddum, components of the bark, III (Ramanujam and Seshadri), 175.

Raman spectra of crystalline sulphates of Ni and Mn (Krishnamurti), 355.

Raman spectrum of crystalline α-glycine (Krishnan and Balasubramanian), 55.

Raman spectrum of crystalline tri-glycine sulphate $(NH_3 \cdot CH_2 \cdot COO)_3 H_2SO_4$ (Krishnan and Balasubramanian), 138.

Redoxokinetic effect: preparation of reproducible electrode surfaces, studies (Narayanan and others), 165.

Self-reciprocal functions in the form of series (Rao), 263.

Spectrum of iodine excited in the presence of argon (Verma), 197.

Ultrasonic velocities in rocks: Some special features of Indian granites (Balakrishna), 69.

Ultraviolet absorption spectrum of tetrahydro-naphthalene, the near (Bapat), 119.

TITLE INDEX

Adducts, β-naphthol maleic anhydride, the configuration (Wariyar), 231.

Benzopyrone series, synthetic experiments, LVIII (Dhar and Seshadri), 79.

Chemical reactions, the role of solvent (Padmanabhan), 368.

Clays, Indian, some, mineralogy (Rao), 359.

Cosmic-ray particles, penetrating, angular distribution of, at a depth 103 MWE below ground (Sreekantan and others), 113.

Crystal spheres, the birefringence patterns of (Raman), 1.

Crystals, the physics (Raman), 327.

Cyperene—II, hydrocarbon, infra-red investigations (Narasimhan and Senich), 156.

Difference-Patterson method, an application (Sasisekharan), 224.

Differential equations, ordinary linear, involving random functions (Mathews and Srinivasan), 4.

Dipole moment of dimethoxy and diethoxy aniline (Anantakrishnan and Rao), 99.

Excited States of C^{12} in the Region 11 to 14 MEV from B^{11} (d, n) C^{12} reaction (Kondaiah), 130.

Heterocyclic rings containing nitrogen, studies in the formation, I (Rao and Ratnam), 173.

Hexachloroceric acid, studies, I (Moosath and Rao), 213; II (Moosath), 220; III (Moosath and Rao), 265; IV (Moosath), 272.

Light from the sky during twilight, intensity and polarisation (Dave and Ramanathan), 67; II (Dave), 336.

Light propagation in optically active crystals, phenomenological theory (Pancharatnam), 247.

Midday critical frequencies and heights of the F2 layer over Ahmedabad and other low latitude stations, variation with lunar phase (Kotadia and Ramanathan), 394.

Murexide, decomposition, in acid solutions, kinetics, studies (Ramaiah and others), 286.

Murexide, polarographic studies, I (Ramaiah and Vishnu), 297.

Non-Newtonian liquids, certain, steady laminar flow of, through an elastic tube (Narasimhan), 237.

Nuclear disintegrations produced in nuclear emulsions by α-particles of great energy (Rao and others), 181.

Optical activity, dependence, on chemical constitution, studies, XLIII (Singh and others), 21.

Photo-elastic constants in plastics, temperature dependence (Bhagavantam and Murty), 203.

Physiologically active compounds, search, II (Rao and Sundaramurthy), 149.

Polarographic behaviour of metals in ethanolamines, I (Subrahmanya), 133; II, 383.

Raman spectrum of magnesite (Krishnamurti), 210.

Short-lived activities: Ag^{108}, Ag^{110} and In^{116}, conveyor belt method for studying (Joshi and Thosar), 255.

Short-lived activities, half-lives, with a pulsed neutron source and a ten channel time analyser (Veeraraghavan), 319.

Solar flare of February 23, 1956, great, and associated ionospheric effects at Ahmedabad (Ramanathan and others), 306.

Solar flare type increase in cosmic rays at low latitudes (Sarabhai and others), 309.

Stochastic processes associated with a symmetric oscillatory Poisson process (Ramakrishnan and Mathews), 84.

Tauberian theorems, two, for the Borel transform of a sequence (Vijayaraghavan and Rajagopal), 163.

Transition phenomena at saturation temperature (Vishnu), 46.

X-ray diffraction by binary liquid mixtures: pyridine-fatty acid systems (Lakshmanan), 152.

Ultrasonics, transmission, through binary liquid mixtures (Krishnamurthi), 106.

Uranium (VI), spectrophotometric estimation, by Morellin (Rao and Patel), 276.

Virial problems related to simple wing profiles (Rao), 53.
